Tools

Saw to cut boards to length

Pocket hole jig

Tape Measure

Drill

Screwdriver for small hinge screw

Drill bits

Sander

Supplies

2 ½" Wood Screw

4- 1 ½" Hinges

2- 3" Hinges

1 latch closure

hooks for tools

1 drawer pull

pocket hole screws

paint or stain

Cut List

(11)- 2X4 @ 36"

(9)- 2X4 @ 33"

(6)- 2X4 @ 17"

(1)- ¾" plywood @ 36" X 20"

(2)- ¾" plywood @ 16 ½" X 17"

(2)- 2X4 @ 2 ¾"

Step 1

Make two leg support sections by joining (2) 2X4 @ 36" with (1) 2X4 @ 33". The 33" boards will start 6" from the bottom. Attach with 2 ½" wood screws.

Step 2

Join the two leg support sections by attaching (2) 2X4 @ 17". The 2X4 will lay flat against the 36" legs.

Repeat the same process for the top shelf supports. Attach with 2 ½" wood screws.

Step 3

Cut board for the top and bottom shelf. You will need (5) 2X4 @ 33" for the bottom shelf and (5) 2X4 @ 36" for the top shelf. Attach with 2 ½" wood screws.

Step 4

Top Assembly- Drill pocket holes in (2) 2X4 @ 36" and (2) 2X4 @ 17". Pocket hole placement is shown by the arrows in the picture. Lay your $\frac{3}{4}$ " plywood on a flat surface and attach your 2X4 boards with pocket hole screws.

Step 5

Now attach your (2) 2X4 cut @ $2\frac{3}{4}$ " to the middle of the top and bottom of the inside. This will give your doors something to rest on.

Step 6

Door assembly- attach the $\frac{3}{4}$ " plywood cut @ 16 $\frac{1}{2}$ " x 17" to each side of the top frame. Place hinges 4" from the top and 11.5". Drill pilot holes on this step to keep the wood from splitting.

Step 7

Attach the latch closure to the outside of the doors to prevent opening when in a closed position.

Attach hooks on the inside of the cabinet to hold all of your gardening tools.

Attach a drawer pull to the outside of the cabinet to assist in raising and lowering.

Step 8

Attach the top cabinet to the lower frame with (2) 3" hinges. Place the hinges 6" from both sides of the back.

Optional- Place two felt circles in the top left and right corners of the cabinet to help avoid banging when closing for party cart use. Hooks can also be added to the sides to hold additional supplies.
